Patient Information

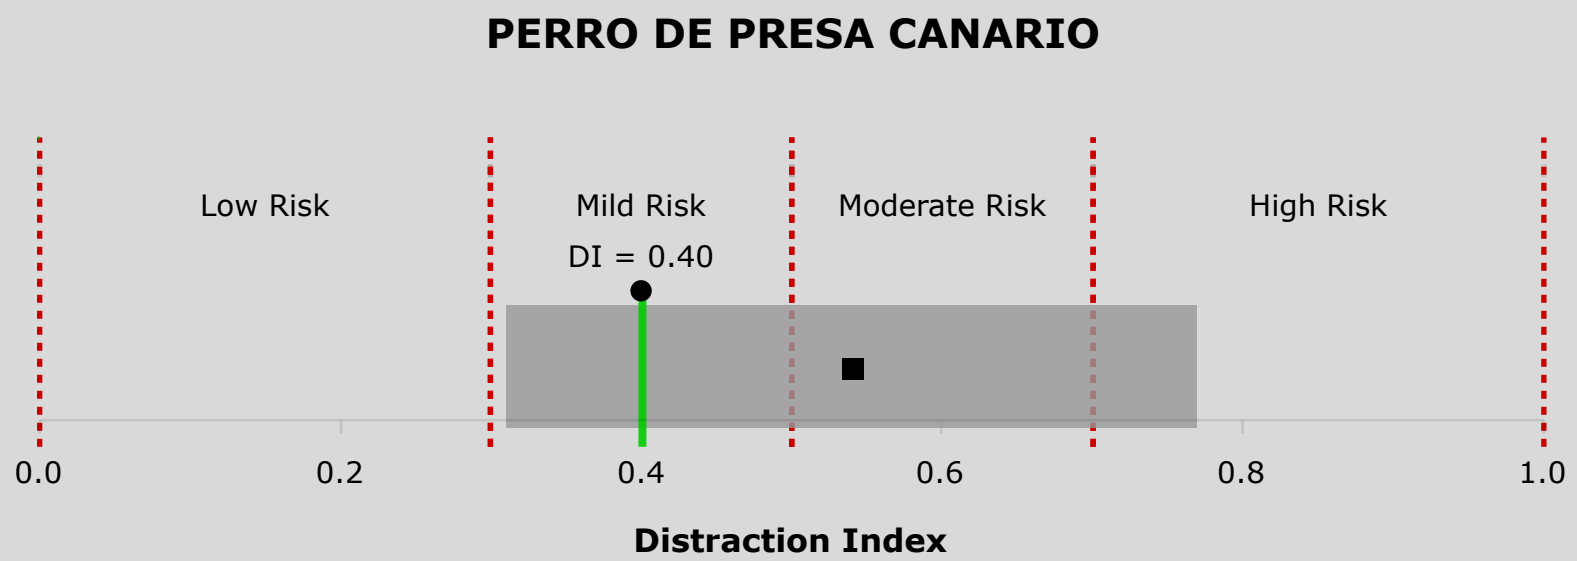

Client: Valentine, Todd Patient Name: K9K Nahla Reg. Name: PennHIP Num: 195077 Species: Canine Date of Birth: 08 Jun 2021 Sex: Female Date of Study: 25 Oct 2023 Date of Report: 26 Oct 2023	Tattoo Num: Patient ID: 307d41a9-7b1d-4041-ab98-5938caf32cbd Registration Num: Microchip Num: 985113005578610 Breed: PERRO DE PRESA CANARIO Age: 28 months Weight: 82.2 lbs/37.3 kgs Date Submitted: 25 Oct 2023
--	---

Findings

Distraction Index (DI): Right DI = 0.40, Left DI = 0.36. Osteoarthritis (OA): No radiographic evidence of OA for either hip. Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.40.
 OA Risk Category: The DI is between 0.31 and 0.49. This patient is at mild risk for hip OA.
 Distraction Index Chart:

BREED STATISTICS: This interpretation is based on a cross-section of 501 canine patients of the PERRO DE PRESA CANARIO breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.31 - 0.77) for the breed. The breed average DI is 0.54 (solid square). The patient DI is the solid circle (0.40).

SUMMARY: The degree of laxity (DI = 0.40) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a mild risk to develop hip OA. **No radiographic evidence of OA for either hip.**
